

Production Access Questionnaire

Testers Community

The objective of this report is to provide comprehensive answers that our clients can use to fill the production access form. You can use the answers directly or can make changes based on how you improved the app. After 14 days of testing, users will be prompted to fill a form on closed testing to get access to production. This document can be helpful in answering those questions.

App Name: Ridewealth Assistant

App URL:

<https://play.google.com/store/apps/details?id=com.ridewealthassistant.app>

Production Access Questionnaire

1) How did you recruit users for your closed test? For example, did you ask friends and family, or use a paid testing provider?

I utilized a dedicated app testing service to gather a diverse group of users familiar with app functionalities. I also engaged potential users through social media channels, ensuring we reached a wide audience. Their insights have been invaluable for refining the app experience.

2) How easy was it to recruit testers for your app?

Answer: Easy

(You can select your own answer).

3) Describe the engagement you received from testers during your closed test

Testers provided insightful feedback on user experience, helping to identify key areas for improvement, such as onboarding, UI design, and accessibility

features. Their active participation prompted necessary updates and significantly enriched the overall usability of the app.

**4) Provide a summary of the feedback that you received from testers.
Include how you collected the feedback.**

Testers highlighted the need for a dynamic walkthrough, improved Play Store screenshots, expanded login options, error messages, system theme support, and essential legal pages. Feedback was gathered through surveys and direct communication to ensure thorough understanding.

5) Who is the intended audience for your app?

RideWealth Assistant is designed for users seeking efficient management and vehicle-related services. It's suitable for anyone looking to streamline their ride solutions and enhance their overall experience in monitoring and tracking vehicle information effortlessly.

6) Describe how your app provides value to the users.

RideWealth Assistant enhances user convenience by offering valuable vehicle management tools, seamless ride integration, and personalized user

experiences. Our app prioritizes efficiency and user-friendly features, ensuring users can manage their rides effortlessly and effectively.

7) How many installs do you expect your app to have in your first year?

Answer: 10k - 100k

(You can select your own answer).

8) What changes did you make to your app based on what you learned during your closed test?

We addressed critical feedback by implementing a dynamic user walkthrough, refining UI elements, expanding login options, ensuring the app follows system themes, and adding legal pages, greatly improving usability and accessibility for a superior user experience.

9) How did you decide that your app is ready for production?

After extensive testing and refinement based on user feedback, we've resolved key issues related to onboarding, UI/UX, and legal compliance. The app now showcases stability, an enhanced interface, and is user-friendly, making it well-prepared for a successful launch.

10) What did you do differently this time?

This time, we prioritized direct engagement with users and focused intensively on usability enhancements based on real-time feedback. By implementing structured feedback sessions, we ensured our app looks polished and delivers a user-centric experience ready for production.

You can use the above answers or add your personal touch to those answers to make them more natural and meaningful. Don't forget that this form plays the most important role in the entire process of getting production access. If you have any more questions, please feel free to contact us.

**Best regards,
Testers Community Team**
